SMART 11

SMART11 — SMARTCOACH

CONTENT LEVEL COURSES

A complete overview of what you learn in each level of the Smart11 methodology — from foundational analysis to advanced performance coaching.

LEVEL 1 | LEVEL 2 | LEVEL 3

LEVEL 1

CONTENT

SMART 11

MODULE 1

Introduction to the Methodology

Introduction to analyzing players individually

Foundation of the Smart11 methodology:

- Game Actions
- Football roles
- Decisions and execution of individual actions

Practical:

- Working with SmartCoach
- How to create and analyze clips

Goal: you understand how we look at football

MODULE 2

Match Themes & Game Actions

You learn to recognize and understand optimal responses in the most important match situations across 4 themes:

- Build-up
- 1v1 defending & attacking
- Depth defending & attacking
- Defending & attacking crosses

For each theme you learn:

- What is the player's objective
- What is the maximum result
- Which decisions players make in that situation
- What often goes wrong (and why)
- How players can execute optimally

Goal: you understand how players can optimally respond to the most recurring match situations

MODULE 3

From Analysis to Training

Now you apply it on the pitch.

- How to create mini-lessons per situation
- How to translate analysis into concrete behavior
- Concrete training exercises (PDFs) per theme
- Demo: how to teach players to analyze themselves

Goal: you know how to analyze, make it trainable, and give players ownership over their development

RESULT AFTER LEVEL 1

- You understand the power of analyzing players individually
- You recognize the key individual football actions (Game Actions)
- You understand the objective and maximum result per Game Action
- You see the decisions players make and where things often go wrong
- You can create individual analyses using SmartCoach
- You know how to translate analysis to the training pitch
- You can use mini-lessons to quickly teach players a specific theme
- You can explain to players how to analyze themselves

LEVEL 2

CONTENT

SMART 11

MODULE 1

Advanced Match Theme Analysis

You deepen your understanding of all Level 1 themes:

- Build-up
- 1v1 defending & attacking
- Depth defending & attacking
- Defending & attacking crosses

You learn:

- To recognize situations earlier
- All preparatory Game Actions
- To identify patterns in player behavior
- To see where things structurally go wrong

Goal: you quickly recognize recurring patterns per position

MODULE 2

Position-Specific Analysis

You learn to analyze decisions and behavior per position:

- Centre-back
- Fullback
- Midfielder
- Winger
- Striker

You learn:

- What typical behavior looks like per position
- What happens when players display certain behaviors
- To recognize interactions (e.g. centre-back + midfielder, fullback + winger)
- How one player's decisions affect others

You move from individual moments to understanding behavior and interaction

MODULE 3

From Analysis to Concrete Advice

You turn patterns into clear improvements.

- Translate patterns into concrete insights
- Determine the most important improvement point
- Formulate clear advice for the player or (performance) coach

You learn:

- This is happening → this is how to fix it
- How to communicate this simply and clearly
- How to use analysis within performance coaching

Goal: you create analyses that lead to directly applicable advice

RESULT AFTER LEVEL 2

- You recognize patterns in player behavior
- You understand what is happening per position and in interactions
- You can translate analysis into clear and practical advice
- You coach more effectively on what truly matters

LEVEL 3

CONTENT

SMART 11

MODULE 1

From Analysis to Development Plan

You learn how to turn an analysis (e.g. from Level 2) into a focused development plan per player.

You learn:

- How to determine the most important improvement point
- How to set priorities based on impact
- What to focus on and what not
- How long to work on specific areas

Goal: you turn analysis into a structured development cycle instead of loose insights

MODULE 2

Building an Individual Development Path

You learn how to guide a player within a structured trajectory.

- Define focus together with the player
- Set up a clear trajectory (e.g. 4–6 weeks)
- Bring structure into development

You learn:

- How to involve players in their own development
- How to set clear expectations
- How to track progress

Goal: you guide players in a structured development process with clear focus, purpose, and timeline

MODULE 3

Performance Coaching & Sessions

You learn how to guide players at a high level and make them more independent.

- Build and deliver 1-on-1 sessions
- Work with players who analyzed themselves or were analyzed by you
- Help players reflect on their own behavior
- Connect development to data and performance
- Make progress visible

Goal: you can run effective 1-on-1 sessions, stimulate reflection, and guide players toward independence and better performance

RESULT AFTER LEVEL 3

- You turn analyses into structured development plans
- You guide players through clear development trajectories
- You connect development to measurable progress (data)
- You run effective 1-on-1 sessions
- You work with both self-analyzing players and your own analyses
